THE GUARANTEE

Included in the Summit Package is our guarantee program. Should a viable embryo not result from your cycle, Elevate will cover your legal fees, insurance policy, escrow, and pre-screening fees for any donor should you need another cycle.

1. Your donor will be medically cleared

If your donor is not cleared by your physician (low AMH, AFC, Infectious Disease Testing, Carrier Screening match or any other medical reason) then you will be rematched with an Elevate donor of your choice and not be responsible for any additional coordination fees, psychological assessment fees, AMH fees, genetic counseling and pedigree costs, insurance policies, escrow or legal services for the intended parents and the donor.

Sometimes a donor is not medically cleared because of a matching carrier mutation with the intended parents. Though unfortunate, the Summit Package still acts as a guarantee program and our agency will rematch you at no additional agency fee or screening costs.

2. You will have at least one (1) post -PGT viable embryo

Summit assures you have at least one (1) viable embryo post preimplantation genetic testing (PGT). A viable embryo is defined as an embryo that an IVF physician deems satisfactory for implantation via an embryo transfer procedure. If there is no viable embryo then you will be rematched with the same or a different Elevate donor at no additional cost for another cycle.
